Colormetric Test Strips

Test Strip Overview

The Nitrate/Nitrite test strip measures Nitrate and Nitrite levels in parts per million and milligrams per liter. Simply dip test strip into water sample and match to color chart to see if your Nitrate/Nitrite levels meet EPA and WHO safety standards.

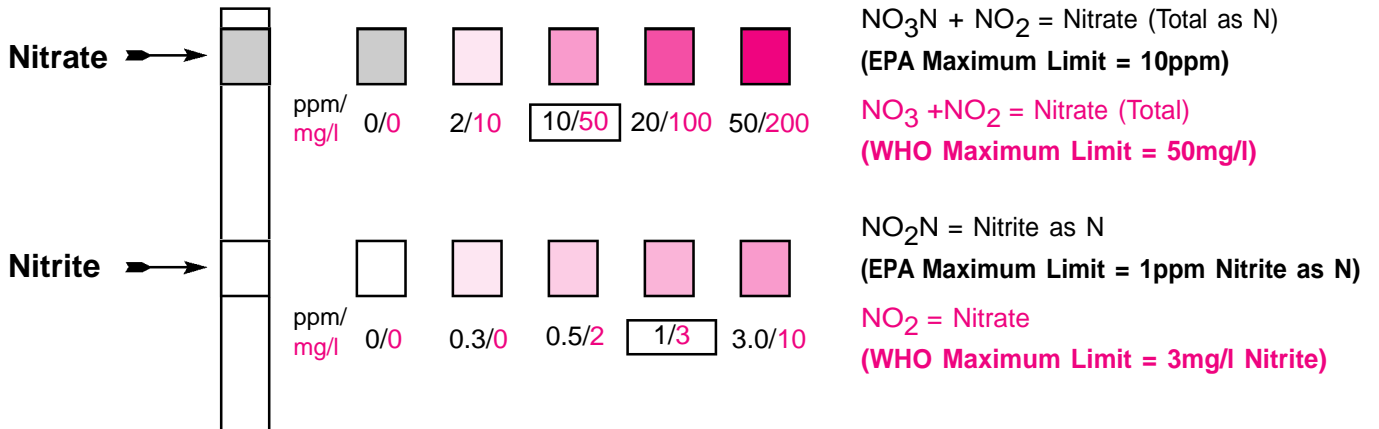

Operation Steps

Step 1: Run Test

Dip test strip in water sample for 2 seconds. Remove. After 1 minute match strip colors and record results.

Step 2: Reading Test results

Observe the color of the 2 squares on the test strip and match to chart on back of packet.
